

Powerful reports made quick and easy!

Net Reports is our client/server solution capable of extracting powerful and complex reports from any database server. All you need is basically a computer and access to the internet and you will benefit from 6 report types, a user friendly interface, speed, security and multiple options for a complete solution, based on the revolutionary PSG software development platform.

Why should you choose NetReports?

User interface – regardless of your level of computer expertise, we think it would be pretty cruel to allow you to hopelessly wander through more virtual buttons than your keyboard has. Just check out some features of Net Reports' simple and intuitive user interface!

Making reports becomes simple and rewarding, so you'll come back to NetReports just because of the fun involved in using it!.

Installation and setup - all you need to do is download and install the client application, open a user account, set it up for your local account profile and you're good to go! If you want to know more, just take a peak at the downloadable User manual, which tells you exactly what to do to get things done.

Administration – you won't need a super qualified person to have Net Reports running! Everything goes smooth from assigning rights for users or user groups, to configuring the system for an optimal performance. We have designed things so that operations are safe and easy to perform, in order for you to

get the most out of Net Reports. Every needed detail is available in the User Manual so, why not take a look?

Security - We know how important all those huge amounts of data are, so we're keeping an extra eye open! All safe access, in respect to the assigned user/ user group rights at the location of your choice!

Report types - NetReports offers the most important dynamic report types, such as:

- Print report
- Ms. Excel - list
- *Files*
- *CrossTab*
- *DashBoard*
- Ms.Excel – Pivot Table

These 4 easy steps will transform the usual report related fuss, into a nice and enjoyable activity:

- Install the application
- Access the user interface
- View already created reports or create new ones
- Share them with anyone you want

We keep things simple and effective so that you may succeed in your daily report creation and management duties!
